## PREFACE

25X1

This is a [ ] report. Personnel receiving this report are cautioned that a strict need-to-know principle applies.

This Mission Coverage Index (MCI) lists targets of intelligence interest in China and North Vietnam covered by aerial photographic material from Mission 6066, dated 11 August 1963. A target description, based on photographic interpretation, is included for each target, except for those in which no significant change was observed.

Targets are arranged by 1) country, 2) within a country by subject, 3) within a subject by WAC area, and 4) within a WAC area by coordinates reading from south to north and from west to east. Column headings, photo reference data, and symbols indicating conditions which affect the appearance of the target on the photography are explained in the appendix. For the convenience of the recipient, a subject index has been included listing targets 1) by category, 2) by country within the category, and 3) alphabetically by place name within the country.

The recipient of this MCI is cautioned that the scan of photography from Mission 6066 was accomplished in a relatively short time and often without the aid of precise analytical and mensural equipment commonly employed in detailed photographic analysis. Consequently, although the information is essentially accurate, it may be altered somewhat by additional detailed analysis.

APPENDIX  
EXPLANATION OF COLUMN HEADINGS  
AND PHOTO REFERENCES

COLUMN HEADINGS

City, Installation -- This column contains the name of the city or town nearest the installation, followed by the name of the installation. If the name of the installation is not known, it is titled according to its function. Where appropriate, the city and installation names are followed by a capsule description.

Coordinates -- Coordinates are referenced to the SW corner of the minute square. When the subject installation covers a wide area, coordinates are given for the approximate center of the installation.

WAC -- This column provides the World Aeronautical Chart number for the area in which the subject installation lies.

Installation Numbers -- This column is divided into two subcolumns. The first subcolumn lists, when known, the BE installation number assigned to the target. The second subcolumn lists the installation number assigned by NPIC. Installation numbers, when used to reference an item, should be prefixed by the appropriate WAC number, since installation numbers are repeated from WAC to WAC. For example, there is an NPIC target number 0615-1 and an NPIC target number 0616-1. In each instance, the NPIC installation number is 1, but the installations appear on different WACs.

#### PHOTO REFERENCE DATA

The photo reference indicates frame(s) on which the target appears.

#### CONDITIONS AFFECTING PHOTOGRAPHY

Following the photo reference data, symbols indicate conditions which affect the appearance of the target on the photography. The symbols are as follows: C (clear), SC (scattered clouds), HC (heavy clouds), H (haze), CS (cloud shadow), D (darkness), SD (semidarkness), O (obliquity), S (snow), and PQ (poor image quality).
